

Cantina del Nebbiolo s.c.a	Quality and Food Safety Policy	Ed. 01 Rev. 01 Date: 22/11/2023
	A.5.3	Page 1 di 1

The **mission** of the Cantina del Nebbiolo in Vezza d'Alba (CN) is to offer to medium market segments typical quality and sustainable Italian products characterized by a favorable quality-price ratio.

The fundamental **principles** that inspire the Cantina del Nebbiolo winery in Vezza d'Alba (CN) are:

- offer its customers high and constant quality products in line with market demands, seeking to affirm the image and exploit the diversification of the markets
- Respect for the natural environment in which the structure and the owned vineyards are located and the sustainability of its production
- Compliance with national regulations in the field of workplace safety and food safety
- Respect for workers' rights by applying ILO conventions
- Compliance with the Equalitas standard

As part of these development strategic lines based on the principles of Total Quality, aimed to maintain the cutting-edge position achieved in its market segments and guaranteeing the maintenance of full competitive capacity in the short, medium and long term, it has decided to start a program to achieve the company's Integrated System Certification

In order to pursue its mission, the company management has established the following general **goals**:

- a) clearly identify the customer's needs to translate them into technical requirements and precise commercial commitments
- b) systematically supply products that comply with these requirements and ensure the customer an adequate delivery service
- c) develop a continuous improvement of processes and products, also involving suppliers in the improvement project, with the aim of guaranteeing full customer satisfaction, cost optimisation, staff safety and the working environment
- d) create products that comply with the law, with particular reference to food safety, traceability, labeling and environmental respect
- e) implement the Integrated Management System in order to systematically manage the necessary controls on products and processes and provide the related formalization
- f) through the Integrated System, improve the management of human resources, internal organization and the satisfaction of company operators also through incentives to recognize the commitment made and the results obtained
- g) use the of product and process controls results for the purpose of continuously improving production efficiency with relative containment of costs and consumption
- h) create sustainable products by monitoring and reducing the impacts on the natural environment deriving from vineyard management and wine production activities

The Company Management undertakes to set improvement objectives in accordance with this Policy, to create and maintain active an Integrated System for their achievement, assigning adequate human and material resources, to periodically review the effectiveness and efficiency of this System and implement the necessary corrective actions.
